Identity Security for the Cloud Enterprise

Fabrizio Petriconi
Advisory Solution Consultant
Fabrizio.Petriconi@sailpoint.com
You can’t do business without technology, and you can’t securely access technology without **Identity Security**.
The Challenge
The Challenge

On-Premise Resources

Cloud & SaaS
The Challenge
The Challenge
94% of all breaches are identity related.
Rethink Security
Workers are the new perimeter.

Identity is the new firewall.

Rethink Security

Technology-centric

People-centric

System-specific

System-neutral

Role-driven

Static

Self-learning
We pioneered identity governance

We introduced SaaS identity provisioning

We incorporated AI and machine learning into identity analytics

Cloud Governance

2007

2010

2013

2015

2017

2019

2020

2021+

We revolutionized provisioning

We extended identity governance to manage data stored in files

Added the ability to manage RPA

Autonomous Identity Security

SaaS Security & Governance

ERP SOD Controls Monitoring
SailPoint Identity Security

Provision with confidence

Protect at scale

Comply with certainty

Visibility

Acceleration

Automation

Intelligence
Workers are the new perimeter.

Identity is the new firewall.
