Exprivia Group Board of Directors' Management Report.

GROUP PROFILE AND STRUCTURE

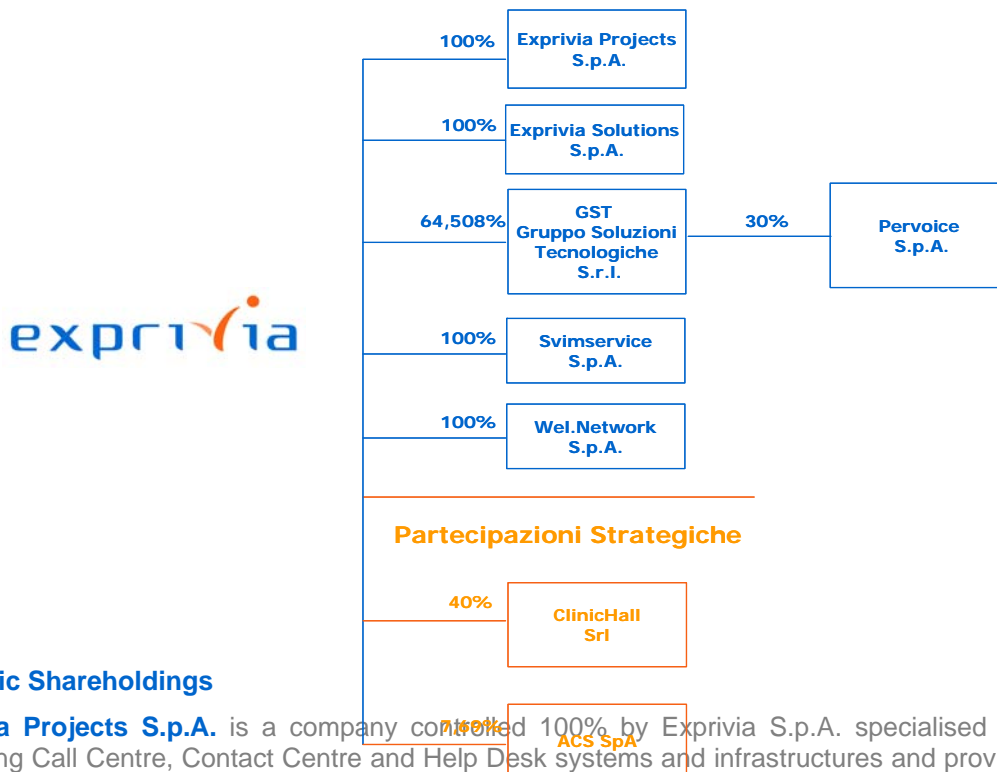

Exprivia is based on a wealth of competences and experience matured in more than 20 years in Information Technology in the banking and finance, industry, telecommunications, utilities, transport, public administration and health markets. Exprivia has always looked to the future, constantly searching for technologies that would anticipate market trends so that it can offer clients solutions and services able to improve their products and services.

This strategic vision, coupled with the knowledge of the specific needs of each client, the vertical offer system, ability to manage complex projects and a research and development division of international excellence are the distinctive elements of the group. Exprivia has been listed on the Italian Stock Exchange since 2000 and the STAR MTA segment since October 2007 and currently has a team of over 1200 staff distributed between its main office in Molfetta (Bari) and those of Milan, Rome, Vicenza, Trento and Bologna.

Exprivia manages company processes effectively based on a quality system in compliance with UNI EN ISO standard 9001:2000 thus guaranteeing maximum transparency inside and outside the company.

As a result of the many years of experience on the market, Exprivia has developed an offer focussed on **proprietary solutions**, mainly in the banking and clinic-health sector and **solutions based on the main third party software platforms** in the ERP, Business Intelligence, SOA, CRM and financial sectors (Capital Market) which it offers to clients by adopting advanced project and application management models.

GROUP STRUCTURE

Strategic Shareholdings

Exprivia Projects S.p.A. is a company controlled 100% by Exprivia S.p.A. specialised in planning and managing Call Centre, Contact Centre and Help Desk systems and infrastructures and providing the relative services, also on behalf of third parties.

Exprivia Solutions S.p.A., owned 100% by Exprivia S.p.A, is the group company dedicated to the creation and supply of high added value solutions and IT products for the defence and space, services and local and central government markets.

G.S.T. - Gruppo Soluzioni Tecnologiche S.r.l., in which Exprivia S.p.A holds a 64.50% stake, focuses on developing and planning voice recognition solutions. Currently GST produces and markets innovative services and software applications using the best speech recognition technologies available on international markets.

Exprivia acquired 100% of Wel.Network S.p.A. and Svimservice S.p.A. on 30 November 2007.

Wel.Network, set up in 1976, has gained a great deal of experience in many traditional sectors of the IT market focusing, in particular, in recent years, on professional services provided on SAP applications with a particular penetration in the industry and energy sector, combined with significant activity in the resale of third party software (Business Object and IBM-Ascential) licences.

Svimservice, set up in 1974, has become an established ICT company in the health IT sector, with the geographic extension and diversification of its customer portfolio and an offer for the development and management of health information systems based on proprietary solutions and web oriented technologies. In addition, it is operative in the field of IT systems and software applications for local government software (P.A.L.).

Strategic shareholdings

ClinicHall S.r.l. in which Exprivia S.p.A. holds a 40% share, was set up in 2004 to give shape to a research and development project for an innovative clinical IT able to support the processes and information that characterise the clinical activities of public and private health structures electronically, using the skills, competences, sales force and references of the companies involved in the capital.

ACS S.p.A., in which Exprivia S.p.A. holds a 7.69% share, plays an important role in the sector of software and hardware for the acquisition, management and interpretation of satellite images at both a national and international level. The company has offices in Rome and Matera and employs more than 110 staff.

Other shareholdings

Exprivia Solutions S.p.A. holds a 100% share in the capital of **Farm Multimedia S.r.l.** It is in the process of being wound up and no longer carries out any industrial activities.

AI Softw@re Professional Services S.r.l., 100% owned by Exprivia Solutions S.p.A., no longer operates on the market since its professional services business was transferred to the parent company on 1 June 2005.

Aemedia S.r.l., 100% owned by Exprivia S.p.A., focuses on video-communication projects but is currently not carrying out any industrial activities.

IQS New S.r.l., of which Exprivia S.p.A. holds a 10% share, is a company developing and managing web services.

Al Faro, 100% owned by Svimservice S.p.A, is a company that carries out technical and management training, intensive training and management consultancy. It also organises refresher and executive-master courses for public administration and the health service. The company was not active in 2007.

Software Engineering Research & Practices S.r.l., in which Exprivia S.p.A. holds a 6% share, is a spin-off of the Università degli Studi di Bari whose aim is to industrialise university research results in the software engineering field and transfer them to company processes.

Exprivia is also part of various consortia:

Consorzio Pugliatech, set up to take part in the 'Programme Contract' included in the Puglia POR 2000-2006 tender;

Consorzio Conca Barese, set up to manage the Conca Barese Territorial Agreement;

Limited liability consortium called 'Centro di Competenza ICT-SUD' (CC ICT-SUD), set up to undertake initiatives appropriate for development in the Objective 1 Regions (Puglia, Campania, Calabria, Sicily and Basilicata) by setting up an ICT Technology Competence Centre spread over a network of regional centres.

Biogene Consortium, for the development of the project called '*Laboratorio pubblico privato per lo sviluppo di strumenti bio-informatici integrati per la genomica, la trascrittomica e la proteomica (LAB GTP)*' (Public-private laboratory for the development of integrated bio-IT instruments for genomics, transcriptomics and proteomics).

GENERAL COMMENTS

The data for 2007, unlike that of the previous year, includes that of the newly acquired companies Svimservice S.p.A. and Wel.Network S.p.A. **as of 01.08.2007**. Therefore, variations in the consolidation perimeter must be borne in mind when comparing data with that of the previous year. Every time a comparison of the two values is considered important, the calculation perimeter will be specified for all values that need to be compared.

SIGNIFICANT GROUP DATA

The following table contains a summary of the Group's main consolidated economic and financial data as per the Balance Sheet. The data below, obtained through the application of the international IAS regulations in force, shows the 2007 information for the Exprivia Group in the current consolidation perimeter, including Svmservice S.p.A. and Wel.Network S.p.A. with effect from 01.08.2007.

(3) - 'Fixed capital' is equal to total non-current assets

(4) - Net financial position = a - (b + c)

The Exprivia Group closed 2007 with **consolidated production revenues** of Euro 65.8 million (+ 39.97% against 2006), **EBITDA** of Euro 10.1 million (+ 81.9% against 2005), **EBIT** of Euro 7.9 million (+129.81% over 2006) and Group **net worth** of Euro 3.5 million (+ 213.2% over 2006). The **net consolidated financial position** as at 31 December 2007 is of Euro -33.9 million compared to the Euro - 6.7 million as at 31/12/06. This increase is due to the Euro 19.5 million financing used for recent acquisitions; net of the above operations, the net financial position would have improved by around Euro 2 million, confirming the Group's capacity to generate cash flow through ordinary management.

As at 31 December 2007, the **net worth** of the group is Euro 45.7 million compared to Euro 28.4 million at 31 December 2006.

SIGNIFICANT GROUP DATA DRAWN UP WITH THE SAME 'REFERENCE PERIMETER'

To better illustrate the results of the recent acquisitions on the main consolidated economic, capital and financial data of the group, it was thought best to complete the information with the consolidated data for the entire reference period and with same consolidation perimeter.

THE OFFER

As a result of the years of experience in the market, Exprivia offers top quality modular solutions and specialised advisory services that are able to adapt to the rapid evolution of the market and its clients' needs. In order to achieve these objectives, the company has constantly extended and diversified its offer, focusing on **proprietary/third party solutions** and high level **technological competence** for the following markets:

- ✓ **Banking & Finance**
- ✓ **Health**
- ✓ **Industry, Telecommunications, Media, Energy & Oil**
- ✓ **Public Administration, Transport and Utilities**

Exprivia guarantees client companies highly technological expertise, excellent specialisation and tried and tested methods thus guaranteeing a competitive offer in line with the highest quality standards. Exprivia is currently one of the most active groups in the planning, development and integration of innovative software solutions, boasting a multitude of skills gained in over twenty years' activity on the reference markets and constant collaboration with leading Italian and international universities.

The markets

Banking and finance

Exprivia has been working for the banking sector for over twenty years in the sphere of **automatic credit scoring systems** and advice on the operational-management processes that subtend the life cycle of credit worthiness and has professional figures with specific competences at various levels, united by a consolidated experience in credit management. Exprivia has a technological competence centre able to design and develop applications that use all the main reporting databases and operate on any platform (both mainframe, and client/server as well as Web platforms) even with different operating systems. Exprivia's many years of experience in **Murex MXG2000** systems is particularly significant as it has acquired great competence through important planning and system management experiences at major investment banks in the Application Management, Front & Back Office, System Implementation and System Integration spheres. With reference to the technological aspect, Exprivia is able to provide structures, methods and solutions dedicated to the management, distribution and integration of mission critical data and applications in the finance sector (Information Management, System Integration and Financial ASP).

Health

Exprivia's offer in this sector focuses on the marketing of a proprietary software platform for the **integration of clinical and diagnostic processes** for public and private hospital structures. Exprivia has confirmed its leadership in the medical market with the most complete range of products for medical diagnostic services, strengthened by the experience gained in medical imaging management technologies since the early 1990s.

The recent acquisition of Svmservice has enabled the group to extend its offer significantly, as a result of the expertise acquired in thirty years' experience in the health sector, and it suggests high added value IT services, advisory, information and operational support for institutional players in health management (health companies, regional agencies and the health policy departments of local councils).

Industry, Telecommunications and Media

Exprivia's offer in **industry** is based on its ability to interpret its customers' business and turn its technological skills into streamlined and efficient solutions for the various operational contexts in which its value chain develops. The result is a series of services and solutions that, in an integrated logic, cover both the primary (logistics, production and sales) and support processes (administration, finance and human resources), paying particular attention to ERP, Extended ERP and EAI.

In the **Telecommunications** market, Exprivia is able to offer mobile and land line operators core process solutions with a complete and innovative system integration offer. Exprivia's experience covers both business support systems (BSS) and operating support systems (OSS). In particular, for BSS, Exprivia has experience and development ability in pricing/billing systems and CRM, for the configuration and management provisioning, order management, testing and quality control systems. In the OSS sphere, Exprivia has designed and developed solutions for the efficient management of network infrastructures, database (Oracle, SQL Server), configuration and network management, performance analysis, operational management of data centres and outsourced Service Level Agreement regulated services.

In the **Defence and Aerospace** sector, Exprivia creates real time applications, and has worked in accordance with civil and military standards, both at a national and international level, since 1985 and has consolidated competences in the production of system software, control systems, embedded systems, graphic tools, networking and complex system prototyping.

With the acquisition of Wel.Network, Exprivia has also strengthened its presence in the **Oil & Gas** sector, integrating its specific competences in the processes of extraction, transport, storage, refining and distribution of petroleum and natural gas with skills gained in related sectors (e.g. multi-utilities) in order to accompany **the evolution of the energy sector**. As a result of its exhaustive knowledge of the market, Exprivia is able to interpret its customers' business and turn its process and technological expertise into efficient and streamlined IT solutions, the result of which is a series of products and services covering both primary and support processes in an integrated logic.

PUBLIC ADMINISTRATION, TRANSPORT AND UTILITIES

Exprivia deals with the following areas for public administration:

- ✓ e-government with solutions in the security sector (digital signature, identity documents, service portals);
- ✓ e-procurement for the rationalisation of public spending with e-catalogue solutions, on-line auctions and marketplace.

In the management sector, Exprivia develops customised solutions, based on SAP IS-U systems for the utilities world and SAP-IS-PS for public administrations. The company also offers Document Management systems and solutions for the management and optical archiving of documents within the various company processes.

The acquisition of Svmservice has added a rich catalogue of products for local bodies (councils, provinces and municipal companies) in the accounting, human resources, management control and e-government system and procedure management (protocols, decisions, resolutions, etc.) sectors.

Competences

The methodological approach adopted, in accordance with standards concerning both the development of software solutions and project management - analysis, planning, development, maintenance and training - guarantees top quality results and enables all project activity phases to be appropriately monitored, optimising time and costs. Exprivia's competence is partly transverse to the reference markets and partly specific to certain sectors:

Transverse Competence

- ✓ ERP and Extended ERP

- ✓ Business Intelligence
- ✓ Enterprise Application Integration
- ✓ Knowledge Management
- ✓ Embedded & Real Time Systems
- ✓ Voice Recognition
- ✓ Visual Collaboration
- ✓ Infrastructure Management System

Vertical Competences

- ✓ RIS & PACS
- ✓ Credit Risk Management
- ✓ Financial Services

Solutions

The high level of technological expertise and the experience gained in particular market sectors has enabled the development of proprietary and third party technological platforms that are known for their excellent reliability, considerable effectiveness in the management of supported business processes and continuous adaptation to technological evolution.

Proprietary solutions

CREDIT RISK MONITORING SOLUTIONS: GLOBAL CREDIT MANAGEMENT

The Global Credit Management solution is an integrated modular system of application solutions aimed at supporting the different activities of assessment, creation, control and management of the credit portfolio of a credit institute.

TRADING ROOM SOLUTION: EXTENDED FINANCIAL FRAMEWORK

This is a proprietary application framework on which the finance solutions and libraries that Exprivia makes available to both Front- and Middle-Offices are based.

RADIOLOGY AND MEDICAL SOLUTIONS

The range of RIS-PACS products for radiology is complete with all application components necessary for following the rapid evolution of the sector, maintaining the investment in time.

NON STRUCTURED INFORMATION PROCESSING SOLUTIONS

DeepKnowledge is a proprietary solution created to support the acquisition, organisation and fruition of explicit knowledge contained in non-structured information of specific domains developed using Natural Language Processing techniques specifically designed for easy integration into existing applications (corporate portal, document management system, content management system, customer relationship management system, etc.).

Third party solutions

MUREX

The **MXG2000** platform, developed by the French company Murex S.A., is amongst the leading products on the market used by investment banks, corporate treasuries, asset managers and hedge funds. Exprivia has been a specialist in the product (with MxRates first followed by MXG2000) for years due to the expertise consolidated in the finance sector and numerous important project and system management experiences in the main investment banks in the following spheres:

- ✓ Application Management (corrective and evolutionary maintenance, customisations, system parameterisation, upgrade release task force);
- ✓ Front Office (instrument configuration, P&L analysis, risk management procedure);
- ✓ Back Office (ticketing & confirmations, payments, warnings, accounting, auditing and management control);
- ✓ System Implementation (OLK, MxML, Reporting Module, Risk Matrix, Flex API and MDCS)
- ✓ System Integration (Deal Capture and market integration, real-time contributor configuration, import and export of registers and transactions, automatic interfacing using MxMI module or main market middleware).

SECURITY: ELECTRONIC VAULT TO PROTECT CONFIDENTIAL DOCUMENTS

Cyber-Ark is an IT security company that has developed a software solution for the secure storage and management of confidential information using a digital vault of which Exprivia is the authorised retailer for Italy.

REMOTE, SWITCHING AND VIDEOCONFERENCE SOLUTIONS

Exprivia distributes and provides support for the leading remote control and switching systems. The combination of remote control and switching systems allows multiple information resources to be centralised and optimised, facilitating access both from an ergonomic and information legibility point of view. In addition, Exprivia markets video-communication solutions that overcome spatial distances and standardise temporal asynchronisms without users having to move physically.

TREND IN THE REFERENCE MARKET IN 2007

Market data

According to Assinform estimates, expenditure on Information Technology continues to grow in Italy. In 2007, growth was 2% compared to the +1.6% of the previous year, higher than that of the GDP of the previous year, around 1.7%. Companies invested more in the IT sector; in particular, medium-sized companies in which investments grew by 1.9% compared to the 1.7% of large companies and 0.6% of small ones. Although there are many cases of major industrial projects adopting new technologies, the innovation process in the Italian production system is still modest, involving a very limited number of companies, and distribution throughout the country is too fragmented.

Analysis of the different IT sectors shows that hardware continued to drive the market in 2007, but the increase in the software sector was the most significant, due to a particularly positive performance of the middleware segment. This increase confirms companies are pursuing innovation as it is a fundamental instrument in projects for the rationalisation of IT infrastructure and application integration. For 2008, Assinform forecasts that, despite the negative scenarios looming over the economy, IT should continue to grow, even if only by around +1.8%, a figure that is, however, destined to exceed the estimated GDP rate of between 0.5% and 0.8%. The driving role of products 'Made in Italy' should be considered within this scenario, in particular that of the clothing, food, furniture and mechanical automation sectors that has found

renewed success as a result of the quality of the products, reorganisation of production and the strong commitment to international markets. More detailed information on the ICT market in 2007 can be found in the Assinform Q1 2007 Report. This shows that the sector grew by 1.7%, reaching around Euro 9,921 million, consolidating the trend to recovery that was still rather weak (+1.1%) in the middle of 2005.

The **software and services** sector (Euro 6,671 million) began to grow once more (+1%) in the first half of 2007 mainly due to the contribution of software, which increased by 3% (compared to 0.6% in the same period of the previous year). In the sphere of IT services (Euro 4,696 million, + 0.2%), the effect of a further drop in prices, the contractual power of major customers and economic uncertainty were evident. The most dynamic sectors were outsourced services (Euro 1,378 million, + 2.1%), embedded systems (Euro 520 million, +0.9%), system integration (Euro 512 million, +0.8%) and consultancy (Euro 532 million; + 1.8%), which only just offset the downward trend of all the other sectors, starting from the most substantial of application development and maintenance (Euro 1,058 million, -1.3%).

Trend in the Exprivia Group results

The following table illustrates the production revenue and EBITDA margins for all four Exprivia Group business lines. The revenue as at 31/12/07 and the relative EBITDA margin were calculated including Svimservice and Wel.Network results for 1-8-07 to 31-12-07 as well. In particular, Svimservice results were included in the PA and Health figures while Wel.Network results were included in the Industry, Telecommunications, Defence and Aerospace and Gas & Oil figures.

Exprivia Group (Values in K Euro)	Revenue 31/12/2007	Revenue 31/12/2006	% Variations	EBITDA 31/12/2007	EBITDA 31/12/2006	% Variations
Banking, Finance and Insurances	12,889	10,527	22.44%	2,080	1,482	40.35%
Industry, Telecommunications & Media	20,468	14,953	36.88%	2,827	2,177	29.86%
PA, Transport & Utilities	14,131	13,101	7.9%	1,188	867	37.02%
Health	15,093	5,556	171.65%	4,003	1,027	289.78%

In order to assess the trend of the group, independently of the contribution made by the new acquisitions, the following table illustrates the production revenue and EBITDA margin of all four Exprivia Group business lines calculated using **the same consolidation perimeter** (without considering, therefore, the revenue and EBITDA of the new acquisitions Svimservice and Wel.Network).

Exprivia Group (Values in K Euro)	Revenue 31/12/2007	Revenue 31/12/2006	% Variations	EBITDA 31/12/2007	EBITDA 31/12/2006	% Variations
Banking, Finance and Insurances	12,843	10,527	22%	2,069	1,482	39.61%
Industry, Telecommunications & Media	15,264	14,953	2.10%	1,976	2,177	-9.23%
PA, Transport & Utilities	12,497	13,101	-4.61%	771	867	-11.07%
Health & Medical	7,597	5,556	36.74%	1,574	1,027	53.26%

Banking, Finance and Insurance

The **Banking, Finance and Insurance** Business Line increased its turnover by 22% compared to 31/12/2006 using the same consolidation perimeter, and the result also remains unchanged considering the post acquisition table. The significant growth in revenue is mainly attributable to two factors. Firstly, the positive result of a business strategy started at the beginning of the year, focused on cross-selling and marketing initiatives that lead to the acquisition of new leading customers and contracts in the Finance Solution, Capital Market and Credit Risk Management sectors. Secondly, Exprivia benefited from the merger/integration of the banking and finance sector that led to the acquisition of extraordinary orders, in particular, during the second half of the year.

Industry, Telecommunications & Media

The **Industry, Telecommunications & Media** Business Line achieved growth of 2.10%, compared to 2006, with the same consolidation perimeter even though the large company market re-dimensioned its IT investment budget. Further, constant monitoring of the market and careful analysis of its features have enabled the group to acquire new customers, also as a result of the all-round integrated offer that combines technical and functional competences, the supply of complete solutions and advisory services in support of core processes. In the SME market, the business decision to focus on central and southern Italy and some specific sectors (food, furniture, retail, E&C, etc.), has enabled collaboration with the reference technology partners to be maximised and some important order obtained from the last quarter of the year, and also create an interesting pipeline of prospects for 2008. Margins fell by 9%, once again suffering from the resale of third party products with reduced margins. If the post acquisition results are taken into account, the increases were more consistent both in terms of revenue and EBITDA margin. Revenue for this business line not only included that of the Exprivia Group but also that of the newly acquired Wel.Network (1/8-31/12) reaching an overall sum of Euro 20.4 million, an increase of 36%. In 2007 Wel.Network's business activities, mainly centred around the Oil & Gas sector, focused on improving margins by substituting the sale of third party products with consultancy and service activities. There was a compensatory effect compared to the pre-acquisition result, which increased the EBITDA margin of the business line by 29.86%.

Public Administration, Transport and Utilities

The revenue from the **Public Administration, Transport and Utilities** business line, calculated with the same consolidation perimeter, was 4.6% lower than that of 2006. The business strategy adopted in 2007 focused on improving margins through three specific actions: re-qualifying relationships with partners, drawing up a more targeted and vertical offer in the PA sector (less focused on Transport and Utilities) and obtaining direct PAC orders. The strategies adopted led to good results both in terms of establishing relationships and obtaining major contracts whose revenue will be seen during 2008. If the post acquisition results are taken into account, Svimservice results in the PAL sector improved revenue at 31/12/2007 by 7.9% on the previous year. Svimservice's business activities in the PAL sector focused mainly on:

- ✓ consolidation of some orders due to expire (a new three-year contract was won for Bari Council Tax System, and the renewal of the payroll management agreement with Milan City Council, etc);
- ✓ new acquisitions of innovative technology whose effects will be felt in the next accounting period (SEBOL portal for territorial marketing services for a group of town councils in Puglia);
- ✓ an increase in the number of added value services for existing orders for Information System management.

These initiatives enabled Svimservice to maintain revenue and margins unchanged within this sector of the market.

Health

The Health Business Line has definitely improved, using the same consolidation, showing an increase of 37% on the 2006 revenue. This result, obtained by refocusing the business structure on a more direct

support of end customers, comes from both the delivery of some significant orders gained in the third quarter in the public health segment and the extension of the installed base private bodies as well as that of the range of offers in other clinical fields.

There was also a decidedly positive result in terms of revenue in the vocal recognition sector, especially as a result of the closure of some significant negotiations and the perfect integration of Reco Sistemi in GST. These results make the Exprivia Group the indisputable leader in the Italian voice recognition sphere in the medical market.

Svimservice's business activities in the medical sector featured a growth in revenue and a marked increase in margins of all the main orders related to the management of the health information system of Puglia and that of the Booking Centres (CUP). In particular, the concept of a multi-channel health booking system, increasing the links with health operators in the area (pharmacists, GPs and private clinics) to complement the services already offered at traditional centres and through Call Centres has definitively developed.

SIGNIFICANT EVENTS DURING THE YEAR

COMPANY EVENTS

Pervice S.p.A., a software house aiming to enhance the voice recognition technology developed at the IRST laboratories of the Bruno Kessler Foundation in Trento through the provision of services and project creation in the automatic voice processing field was set up on **9 March 2007**. GST, part of the Exprivia Group, holds 30% of the company capital.

An ordinary meeting was held at the company's registered office on **27 April 2007** to approve the following resolutions:

- (1) approval of the Balance Sheet as at 31 December 2006, allocating Euro 54,944 of the operating profit of Euro 1,098,875 to the Legal Reserve and Euro 1,043,931.00 to cover the losses of previous years;
- (2) revoke the previous resolution authorising the purchase and provision of its own shares, as unused, and approve a new authorisation, in accordance with Art. 2357 of the Civil Code, to buy and sell the company's own shares;
- (3) extend the assignment of auditing awarded to PKF Italia by another six accounting periods. The assignment is now for an overall total of nine financial years, intending by this the period from 2005 to 2013.

An Extraordinary Meeting was also held on **27 April 2007** that attributing the following powers to the Board of Directors:

- (i) merger decisions in those cases set out in articles 2505 and 2505-*bis*;
- (ii) adaptation of the Articles of Association to the provisions of the law;
- (iii) transfer of the company's registered office in Italy.

On **29 June 2007**, the Board of Directors of Exprivia S.p.A. decided to make the changes to the Articles of Association necessary to comply with Law 262 ('Savings Law') of 28 December 2005, as subsequently amended and supplemented by Legislative Decree 303 ('Corrective Decree') of 29 December 2006, in accordance with the powers attributed to them by the Extraordinary Meeting of 27 April. The aforesaid regulations introduced some significant changes, mainly concerning the methods of appointing Board members and the control of listed companies.

The project to merge Reco Sistemi S.r.l. into the parent company G.S.T S.r.l., approved by the Extraordinary meetings of the two companies held on **3 July 2007**, was carried out on **19 September 2007**.

The Company's Extraordinary Meeting was held on **30 November 2007** to implement the following increases in capital proposed by the Board of Directors:

- ✓ a capital increase for an overall Euro 6 million, issuing 4,125,413 new ordinary shares with a surcharge of Euro 0.9344, excluding option rights in accordance with article 2441, subsection 5, of the Civil Code, with contextual underwriting and release through the allocation to reserve capital by payment into the capital increase deposit account entered in the Balance Sheet of Exprivia from 31 December 2005 of Euro 6 million by the current controlling partner **Abaco Innovazione S.p.A.**
- ✓ a capital increase for an overall Euro 2,375 million, issuing 1,078,516 new ordinary shares with a surcharge of Euro 1.6821, excluding option rights in accordance with Articles 2440 and 2441, subsection 4, of the Civil Code, with contextual underwriting and release through a non-cash consideration of the shareholding of 25% in Wel.Network S.p.A. by **Data Management S.p.A.**
- ✓ a capital increase for an overall Euro 6 million, issuing 2,794,207 new ordinary shares with a surcharge of Euro 1.6273, excluding option rights in accordance with Articles 2440 and 2441, subsection 4, of the Civil Code, with contextual underwriting and release through a non-cash consideration of the shareholding of 22.73% in Svimservice S.p.A. by **Merula S.r.l.**

The parent company Exprivia S.p.A. acquired 100% of **SVIMSERVICE S.p.A.** and **WEL,NETWORK S.p.A.** on **30 November 2007** with the aforesaid capital increases.

On **7 December 2007** Exprivia increased its shareholding in ClinicHall S.r.l. from 22% to 40% of the company capital purchasing the relative shares from other partners; on the same date, ClinicHall S.r.l. held a meeting to discuss a capital increase (from € 100,000 to € 300,000); Exprivia S.p.A. underwrote its share of the capital increase (40%).

On **21 December 2007** Exprivia Projects S.p.A. merged with Exprivia Customer Services S.r.l. with public document of the Notary Mr. Stellacci of Molfetta. The merger project was approved by the Extraordinary Meetings of the two companies held on **15 October 2007**.

The document to transfer the branch of the business of Exprivia Projects concerned with the 'Supply of systemic services for the management of ICT infrastructure and the development and management of business process support applications' to Exprivia S.p.A. was signed on **28 December 2007**.

Stock Option Plan

On **29 June 2007**, the Board of Directors deliberated the **Assignment of a second packet of 1,031,000 personal and non-transferable stock options relating to 2007**, intended for around 15% of the group's workforce, thus implementing the regulations approved on 20 December 2006. The options assigned concern 3.03% of the company capital in addition to the 1,238,000 options assigned with the first packet. The Board also identified achievement of the performance objectives referring to the consolidated EBTIDA (gross operating margin) of the Exprivia group as per the 2007 Balance Sheet as conditions for the accrual of stock accrual for this second packet. The options can be exercised in the ratio of one share for each option assigned. The options assigned for 2007 can only be exercised at a price of Euro 2.2034 from 1/07/2010 to 31/12/2010, subject to the accrual conditions being fulfilled.

The assignee's rights in relation to the options assigned are intrinsically and operationally linked and conditioned to the continuance of the relative requirements for each assignee at the time the options are exercised.

PROPERTY

All group property is in the name of the parent company, Exprivia S.p.A. The building at Viale Pio XI 40, Molfetta (Bari) consists of two premises of around 120 m². The company's current registered office, in Viale Ariano Olivetti s.n.c., Molfetta, extends over a surface area of 7,950 m², with four buildings totalling around 5.000 m², built in accordance with building permission No 7584 of 2 August 2002.

Training courses in the most modern information technologies are organised and held for numerous groups of people in the Molfetta office and the strategies of evolution in the expertise of the technical staff (both internal and of clients) is based on continuous professional updating.

The areas dedicated to IT instruments, equipped with sophisticated security systems, are not only able to house the current equipment necessary to manage and evolution of group infrastructures and the Research and Development laboratory, but also additional IT systems that can be used to offer the market complete solutions with project development and outsourced management with the latest security systems operating round the clock.

RELATIONSHIPS BETWEEN THE SUBSIDIARIES OF THE GROUP

Companies of the group have worked together on important projects aimed not only at optimising operational and staff structures, but also at the commercial, technological and application level. In particular, there is:

- ✓ widespread use of specific corporate marketing and communication competences within the group, creating paper, digital and Web advertising material;
- ✓ centralised management for the supply of specialised technical resources between group companies to manage staff turnover problems and render highly specialised technical skills available to all operational units;
- ✓ coordinated participation by Exprivia in public tenders for contract with the contribution of all companies, depending on their specific expertise;
- ✓ use of integrated accounting information systems to enable financial and administrative management to be centralised and optimised, and use of an integrated and centralised accounting management for projects and orders;
- ✓ centralised logistics function on behalf of all companies.

In addition, a cash pooling relationship based on the collaboration of some leading credit institutes and regulated by a particularly favourable interest rate has been activated within the Exprivia group.

- ✓ decided to distribute the profit earned in 2007 and the extraordinary reserve amounting to around Euro 4 million.

Acquisitions/Transfers within the Exprivia Group

On **31 January 2008**, Exprivia S.p.A. increased its share in ClinicalHall S.r.l. by 4% (taking it to 44%) underwriting part of the capital increase remaining.

On **25 February 2008** Exprivia S.p.A. increased its share in G.S.T. S.r.l. by 1.3% (taking it to 66.846%) purchasing part of the shares sold by another partner.

MANAGEMENT FORECAST

Management objectives are now aimed at launching effective and fast commercial development to expand market shares in strategic sectors after giving priority to pursuing strict cost control and reduction measures. These led to concrete results in 2007 with a net increase in industrial margins of Business and Service Lines. In order to achieve this objective, a managerial structure that tends to operationally integrate both the business and industrial organisations of the Exprivia Group and the companies Svimservice S.p.A. and Wel.Network S.p.A., which formally entered the group as of 1 December 2007, is being defined.

DEVELOPMENT PROSPECTS

The results achieved during 2007, and in particular during the second half of the year, confirm the strategic growth objectives communicated to the market in February 2006. Development strategies aim to position the Exprivia brand as the leading company on the national market for ability to innovate and the speed with which innovative solutions are offered. It is intended to use current positioning (multi-sector, multi-niche) to develop cross selling activities and, at the same time, develop strategic alliances with primary institutions to also extend the offer to foreign markets. The stated aim of the Exprivia group is to become a player able to position itself amongst the top ten national ICT groups, focusing its operating strategy on innovation, speed and cover, also of foreign markets.

The growth strategy for external lines has been confirmed acquiring the companies Svimservice and Wel.Network:

Wel.Network has gained a great deal of experience in many traditional sectors of the IT market focusing, in particular, in recent years, on professional services provided on SAP applications with a particular

penetration in the industry and energy sector, combined with significant activity in the resale of third party software (Business Object and IBM-Ascential) licences. The company has around 160 staff (employees and collaborators) in the registered office of Piacenza and the operational offices in Milan and Rome,

Svimservice has become an established ICT company in the health IT sector, with the geographic extension and diversification of its customer portfolio and an offer for the development and management of health information systems based on proprietary solutions and web oriented technologies. In addition, it is operative in the field of IT systems and software applications for local government software (P.A.L.). This has made Svimservice, with its head office in Bari, the leading company in Puglia and also giving it an important position in the domestic market.

ORGANISATIONAL MANAGEMENT AND CONTROL MODEL AS PER LEGIS. DEC. 231/2001

The company has almost completed the work necessary for the implementation of the Code of Conduct and model of organisation, management and control for the administrative liability of companies appropriate for preventing the crimes involved, notwithstanding the personal liability of those committing the crimes. The Technical Control Committee and Board of Directors have examined the final drafts of all the relative documents, i.e.:

- 1 - the general part defining the principles, logic and structure of the model referring, in particular, to the supervisory body, staff training and diffusion of the model within the company;
- 2 - special Part A specifically covering relationships with local and central government in order to prevent the crimes set out in Articles 24 and 25;
- 3 - special Part B specifically covering company issues in order to prevent those crimes set out in Art. 25c;
- 4 - the Code of Conduct defining the ethical principles inspiring the model.

These documents will be drawn up according to company quality procedures and circulated to all staff in the group. The supervisory body will be appointed immediately after.

Once the process is complete, it will be published on the company Internet site.

CORPORATE GOVERNANCE

The corporate governance system adopted by Exprivia S.p.A. (referred to below as '**Exprivia**' or the '**company**') supplements the rules and procedures set out in the Articles of Association and applicable provisions of law on which the company and group management and auditing system is based. The essential parts of this are based on the principles and recommendations contained in the new Code of Self-Discipline of listed companies issued by Borsa Italiana S.p.A. in March 2006. It is specified that the company brought its corporate governance structure into line with the criteria set out for the STAR segment at the Board meeting of 26 March 2007. The management and auditing model adopted by the company, in accordance with the Articles of Association, is of the so-called traditional type consisting of a Board of Directors and Board of Auditors; in detail, it features:

- ✓ a Board of Directors;
- ✓ a Board of Auditors called on to supervise observance of the law and deed of incorporation as well as respect for the principles of correct management in carrying out company activities and ensuring the internal auditing and accounting system is appropriate;
- ✓ shareholders' meeting able to deliberate in accordance with the provisions of the law and Articles of Association, amongst others, in ordinary or extraordinary administration:

An exhaustive and detailed description on the topic will be drawn up every year and submitted to the Shareholders' meeting for approval; the said document will be made available to the market in accordance with the law and regulations.

INFORMATION ON MANAGEMENT AND COORDINATION ACTIVITIES (ART. 2497-BIS)

In accordance with articles 2497 and subsequent amendments of the Civil Code regulating transparency in exercising company management and coordination activities, it is specified that the said activity is carried out by Abaco Innovazione S.p.A. with registered office in Viale Adriano Olivetti, Molfetta (Bari), Tax Code and VAT No 05434040720. In carrying out this activity:

- ✓ Abaco Innovazione S.p.A. has not prejudiced our company's interests and assets in any way;
- ✓ complete transparency of intra-group relationships has been guaranteed, thus allowing all those interested to check compliance with the preceding principle;
- ✓ operations with Abaco Innovazione S.p.A and its subsidiary companies were carried out under market conditions, i.e., under the same conditions that would have been applied to independent parties.

Economic and financial relationships with Abaco Innovazione S.p.A. and its subsidiary companies are highlighted in the paragraph on 'Relationships with Exprivia Group companies' of the Management Report. Further, in accordance with Art. 2497 and subsequent amendments regulating transparency in company management and co-ordination activities, the essential data from the last balance sheet of Abaco Innovazione S.p.A. is given below.

EXPLANATORY NOTE TO THE CONSOLIDATED BALANCE SHEET AS AT 31 DECEMBER 2007

DECLARATION OF CONFORMITY WITH INTERNATIONAL IFRS REPORTING STANDARDS

In accordance with European Regulation 1606/2002 of 19 July 2002 and Legislative Decree 38 of 28 February 2005, the Exprivia Group consolidated balance sheet as at 31 December 2007 and that of its parent company, Exprivia S.p.A., presented here, have been drawn up in accordance with the International Reporting Standards approved by the European Community (hereinafter referred to, individually, as IAS/IFRS or overall as IFRSs) described in Art. 81 of Issuer Regulations 11971, issued by CONSOB on 14/05/99, and subsequent amendments. In accordance with the provisions of IFRS standard No 1, we declare that all international IAS/IFRS reporting standards in force at the time were applied in drawing up the Exprivia Group consolidated balance sheet and that of the parent company Exprivia S.p.A.

CONSOLIDATION CRITERIA

In accordance with the provisions of IFRS 3 for inverse mergers (paragraph b7 and subsequent paragraphs), the consolidation area includes the Balance Sheet of Exprivia S.p.A. with those of all subsidiary and affiliated companies, without exception. Subsidiary companies means those in which the parent company has control. The existence of control is presumed when the parent company holds, either directly or indirectly, more than half of the effective rights to vote or those potentially exercisable in meetings on the statement date. Affiliated companies means those in which the company exercises a significant influence. This is presumed when 20% or more of the rights to vote or those potentially exercisable in meetings on the statement date are held. Subsidiary and affiliated companies are consolidated as from the date the Group gains control and deconsolidated as from the date it relinquishes control.

Acquisition of subsidiary and affiliated companies is entered according to the purchase method. The acquisition cost corresponds to the current value of those assets transferred, shares issued or liabilities taken on as at the acquisition date, plus any costs directly attributable. The excess cost in relation to the quota belonging to the group of the acquired company's net current assets is entered under Assets as Goodwill for subsidiary companies and included in the value of the shareholding for affiliated companies. Debit goodwill is entered in the Profit and Loss Account on the acquisition date.

The global integration method is applied when consolidating subsidiary companies, i.e., assuming the entire amount of assets and liabilities and all costs and revenue irrespective of the actual percentage of the shareholding. Therefore, the accounting value of consolidated shareholdings is replaced by the relative Net Worth. Operations, balances and profits and losses not achieved on infra-group transactions are annulled. Minority shareholder quotas of the Net Worth and results are highlighted in an appropriate Net Worth item and on a separate line of the Consolidated Profit and Loss Account. Once acquired, shareholdings in subsidiary companies are recorded according to the net worth method noting the share belonging to the Group in the result and reserve movements respectively in the Profit and Loss Account and Net Worth. The relative share of profits and losses not achieved on infra-group operations is annulled. If the Group's share of the losses of an affiliated company is the same as or more than the value of the shareholding, the Group does not acknowledge any further losses unless it has obligations to make them up or has made payments on behalf of the affiliate.

ASSESSMENT CRITERIA

Intangible fixed assets

Intangible Fixed Assets are noted at their acquisition or production cost. The acquisition cost is the price paid to purchase the asset and any direct cost sustained to prepare it for use. The acquisition cost is the equivalent cash price on the entry date therefore, if payment is deferred beyond the normal credit extension terms, the difference compared to the equivalent cash price is noted as interest throughout the extension period. As regards intangible fixed assets generated internally, the process to enter assets is distinguished between the research phase (not capitalised) and the one following development (capitalised). The entire project is considered as research if the two phases cannot be distinguished. Financial charges sustained for the acquisition are never capitalised.

Goodwill

Goodwill, resulting from acquisition or merger operations noted according to the purchase method in accordance with the provisions of IFRS standard 3, is not subject to depreciation but audits to identify any reductions in value ('impairment test') at least once a year. Therefore, goodwill is allocated, as from the acquisition date, or by the end of the year following this, to one or more independent Cash Generating Units. Any reductions in value that emerge from the Impairment test are not adjusted in subsequent periods.

Other intangible fixed assets

Other intangible fixed assets, including development costs, industrial patent rights and copyrights, concessions, licences, trademarks and similar rights and software, are valued at cost net of any depreciation accrued, determined according to the constant share criterion throughout their expected useful life, on average 3/5 years, except in specific cases, and possible losses in value. The depreciation criteria, useful lives and residual values used are reviewed and redefined at the end of each administrative period at least to consider any significant variations.

Tangible fixed assets

Tangible fixed assets are noted at their acquisition or production cost. The acquisition cost is the price paid to purchase the asset and any direct cost sustained to prepare it for use. The acquisition cost is the equivalent cash price on the entry date therefore, if payment is deferred beyond the normal credit extension terms, the difference compared to the equivalent cash price is noted as interest throughout the extension period. Financial charges sustained to acquire or produce the asset are never capitalised. Costs to extend, modernise or improve structural elements owned or used by third parties are capitalised solely within those limits in which they meet requirements to be classified separately as an asset or part of an asset.

Following initial entry, tangible fixed assets are entered at cost, net of any depreciation accrued and any losses in value. The depreciable value of each significant component of a tangible fixed asset, having a different useful life, is divided into constant shares throughout its expected useful life. Considering the homogeneity of assets included in individual balance sheet categories, it is thought that the useful lives per category of assets are as follows, except in specific cases:

Land	indefinite useful life
Industrial buildings	33 years
Systems and machinery	4-7 years
Office furniture and machines	5-8 years

Equipment and motor vehicles

4-7 years

The depreciation criteria, useful lives and residual values used are reviewed and redefined at least at the end of each administrative period to bear in mind any significant variations.

Costs sustained for improvements on third party assets, which may be capitalised, are attributed to those classes of assets they refer to and amortised for the shorter period between the residual duration of the rental contract and residual useful life of the asset the improvement relates to.

The accounting value of tangible fixed assets is maintained in the balance sheet if there is evidence it can be recovered through use. Impairment tests are carried out on those assets where recovery of the net value is doubtful so as to determine a possible loss in value (see following paragraph). The value is restored if the reasons for the said loss no longer exist.

Contributions

Contributions are noted, irrespective of whether there is a formal resolution or not, if it is reasonably certain the company will respect those conditions set out for them to be awarded and the contributions will be received.

A public contribution for expenses and costs already sustained or to provide immediate financial help without incurring any future costs is noted as proceeds in the year it becomes payable.

Asset value losses

A loss in value arises every time the accounting value of an asset is over its recoverable value. Indicators of a possible loss in value are verified on all balance sheet dates. If there are these indicators, the recoverable value of the asset (impairment test) is assessed and possible depreciation accounted for. As for assets not yet available for use, those noted in the year in progress and goodwill, impairment tests are carried out at least once a year independently of the presence of the said indicators.

The recoverable value of an asset is the greater value between its fair value net of sales costs and useful value. The recoverable value of individual assets is calculated, unless they are unable to generate incoming financial flows resulting from their continuous use independently of those of other assets or groups of assets, in which case the test is carried out on the smallest independent flow generating unit that includes the asset in question (Cash Generating Unit).

Financial assets and liabilities

Financial assets are classified in the following categories:

- ✓ *financial assets at their fair value with set off in the profit and loss account:* financial assets acquired mainly with the intention of gaining a profit from the short term fluctuations in price (period of under 3 months) or designated as such from origin;
- ✓ *financial assets held until their expiry date:* investments in fixed term financial assets with fixed or determinable payments the Group intends or is able to maintain until expiry;
- ✓ *loans and other financial loans:* financial assets with fixed or determinable payments, not listed on an active market and different from those classified from the origin as financial assets at their fair value with set off in the profit and loss account or financial assets available for transfer;
- ✓ *financial assets available for transfer:* financial assets other than those referred to above or designated as such from their origin.

The Group classifies financial assets on acquisition, initially entering them at their fair value, as at their acquisition date, and considering the transaction costs. Acquisition or transfer date means the settlement date.

Following initial entry, financial assets at their fair value with set off in the profit and loss account and assets available for transfer are valued at their fair value whereas financial assets held until their expiry date and loans and other financial loans are valued at the amortised cost.

Profits and losses resulting from variations in the fair value of financial assets at their fair value with set off in the profit and loss account are noted in the profit and loss account of the year in which they occur. Profits and losses not achieved as a result of variations in the fair value of assets classified as available for transfer are noted in the net worth.

The fair values of financial assets are determined according to list prices or using financial models. Fair values of non listed financial assets are estimated using the appropriate assessment techniques adapted to the issuer's specific situation. Financial assets for which the current value cannot be determined reliably are entered at cost reduced by losses in value.

The presence of value loss indicators is verified on all balance sheet dates. The relative devaluation is calculated according to the financial asset enhancement criterion and entered in the profit and loss account or net worth. The loss in value previously entered is eliminated if the circumstances that lead to its entry no longer exist, except in the case of assets valued at cost.

Financial liabilities are noted initially at the fair value of the sums collected, net of any transaction costs sustained, and subsequently valued at the depreciated cost.

Stock

Stocks are entered at the lower between the acquisition cost, determined according to the average weighted cost and net realisation value. The cost is represented by the fair value of the price paid and any other directly attributable cost except financial charges. The net realisation value is the estimated sales price net of completion costs and sales expenses. Any depreciation is eliminated during the following years if the reasons no longer exist.

Liquid assets

Liquid assets are very liquid short term investments (generally under 3 months) that are usually easy to convert into known amounts of money and subject to an insignificant risk. Changes in value are noted at their fair value.

For financial statement purposes, liquid assets consist of cash in hand, bank deposits, other very liquid short term assets of under 3 months and overdrawn current accounts. The latter are included in the financial debts of current liabilities.

Net worth

COMPANY CAPITAL

This item consists of the underwritten and paid up capital stock. Costs strictly related to the issue of shares are classified as a reduction in the net worth in other reserves provided that they are variable marginal costs directly attributable to the capital operation and unavoidable in any other way.

OWN SHARES

Own shares are entered in the appropriate net worth reserve. No profit (loss) is entered in the profit and loss account to purchase, sell, issue or cancel own shares.

FAIR VALUE RESERVE

This item contains variations in the pre-tax fair value of items entered at their fair value with set off in the net worth.

OTHER RESERVES

Items consist of specific capital reserves relating to the parent company.

PROFITS (LOSSES) CARRIED FORWARD

This item includes that part of the economic results of the year in progress and those of previous years, that are neither distributed nor set aside (in the case of profits) or made up (in the case of losses), transfers from other reserves once released from those ties they were subject to, as well as the effects of changes in the reporting standards and significant errors.

Employee benefits

SHORT-TERM BENEFITS

Short-term employee benefits are entered in the profit and loss account in the period in which the work activity is carried out.

DEFINED BENEFIT PLANS

The Group acknowledges its employees benefits as Retirement Allowance. The said benefits fall within the definition of defined benefit plans determined in their existence and amount but uncertain in their form. The relative liability is determined as current values of the service obligation defined on the balance sheet date, in accordance with the regulations in force, adjusted to consider the actuarial (profits) losses. The amount of the defined service obligation is calculated annually by an external actuary according to the 'Credit Unit Projection' method. Actuarial profits and losses are entered as a whole in the relative year without applying the so-called 'Corridor method'.

DEFINED CONTRIBUTION PLANS

The Group takes part in compulsory, contractual or voluntary, public or private defined contribution pension plans. Payment of contributions fulfils the Group's obligation in relation to its employees. Therefore, the said contributions constitute costs for the period in which they are due.

Provision for risks and charges, potential assets and liabilities

Provisions for risks and charges represent probable liabilities of uncertain amount/expiry resulting from past events whose fulfilment requires the use of economic resources. Provisions are only set aside for current, legal or implicit liabilities that require the use of economic resources, provided that a reliable estimate of the liability is possible. The amount noted as provision represents the best estimate of the expense necessary to fulfil the obligation as at the balance sheet date. Funds set aside are reviewed at every balance sheet date and adjusted so as to represent the best current estimate.

The amount set aside is represented by the current value of expected future payments to discharge the obligation if the financial outlay takes place outside the normal terms of payment and relative discounting has a significant effect.

Potential assets and liabilities of an improbable but possible or remote nature are not entered in the balance sheet; however, appropriate information is provided as regards the possible assets and liabilities.

Derivative instruments

Derivative contracts are noted at their fair value in the asset and liability statement. Variations in the fair value are recorded in different ways depending on the type of derivative instrument (speculative or cover) and nature of the risk covered (Fair Value Hedge or Cash Flow Hedge).

In the case of speculative contracts, variations in fair value are noted directly in the profit and loss account.

Fair Value Hedges are entered noting the variations in the fair value of the cover and instrument covered in the profit and loss account irrespective of the valuation criterion adopted for the latter. In particular, the accounting value of interest bearing covered financial instruments is amortised in the profit and loss account throughout the residual contractual life of the covered credit/debit using the actual interest method.

Cash Flow Hedges are entered suspending that portion of the variation in the fair value of the cover instrument acknowledged as effective cover in the net worth and noting the ineffective portion in the profit and loss account. The variations noted directly in the net worth are issued to the profit and loss account in the same year or years in which the covered asset or liability influences the profit and loss account.

Revenue and costs

Revenue resulting from the transfer of assets is noted, on transferring the risks that generally take place with shipment, at the fair value of the payment received or due considering any discounts.

Revenue resulting from services is determined according to the percentage of completion, defined as ratio between the amount of services carried out as at the reference date and total value of the foreseen services.

Costs are entered according to similar criteria to that adopted for revenue and however according to accrual.

Interest paid and earned is noted according to the accrual criterion, considering the residual capital liabilities and applicable interest rate during the period until the expiry date.

Dividends are entered within the year the distribution is deliberated.

Taxes

Operating taxes are determined according to the presumable burden to be discharged in observance of the tax regulations in force.

In addition, deferred and advanced taxes on temporary differences between the asset values entered in the balance sheet and corresponding values acknowledged for tax purposes and unused tax losses or credits carried forward are also recorded, provided that recovery (extinction) reduces (increases) future tax payments without the said fiscal effects. The fiscal effects of operations or other facts are noted in the profit and loss account or directly in the net worth, in the same way as those operations or facts that give rise to tax.

Currencies

Currency operations are converted into money at the exchange rate on the day of the said operation, profits and losses resulting from exchange operations and the conversion of monetary assets and liabilities are noted in the profit and loss account.

The consolidated balance sheet as at 31 December 2007 shows the financial and economic situation of Exprivia S.p.A. compared to that of 31 December 2006 after acquiring the shareholdings in Svimservice S.p.A., Al Faro S.r.l. and Wel.Network S.p.A. and excluding two companies. The said exclusion is to be attributed to the Board of Directors of Exprivia S.p.A. which decided to proceed with the sale or divestment of AISoftw@re Professional Services S.r.l. and Aemedia S.r.l. on 29 June 2007.

Contacts have been made for both companies to proceed with their sale as soon as possible. Therefore both companies have been excluded in accordance with the provisions of IFRS 5 – Activities intended for sale and ceased activities – and therefore were classified amongst the current assets under the item ‘shareholdings intended for sale’.

The following table shows those companies subject to consolidation:

The following table summarises the main data of the above-mentioned subsidiaries consolidated with the integral method.

COMPANY CAPITAL

The company capital, entirely paid up, amounts to Euro 2,1801,518,96 and consists of 41,925,998 ordinary shares of the nominal value of Euro 0.52 each. The capital has increased by Euro 4,159,030.72 on the previous year as a result of the increases in capital to acquire Svimservice S.p.A. (Euro 1,452,987.64) and Wel.Network S.p.A. (Euro 560,828.32) and the Abaco Innovazione subscription using the 'future capital increase account reserve' (equal to Euro 2,145,214.76).

OWN SHARES

The balance amounts to zero owing to the sale of own shares.

SHARE SURPLUS RESERVE

This amounts to Euro 12,215,082 as at 31 December 2007, increasing by Euro 10,215,969 as a result of the acquisitions and using the 'future capital increase account reserve' as described in the 'Company Capital' item.

In particular, Euro 4,547,012 relate to the reserved increase to acquire Svimservice S.p.A., Euro 1,814,171, the reserved increase to acquire Wel.Network S.p.A. and Euro 3,854,786 underwritten by Abaco Innovazione S.p.A..

REVALUATION RESERVE

This amounts to Euro 2,672,905 as at 31 December 2007, falling by Euro 360,325 compared to 31 December 2006. The Euro 360,325 variation was reclassified as 'IFRS transaction reserve available' and relates to the corresponding depreciation on property revaluation as at 31 December 2007

OTHER RESERVES

The balance as at 31 December 2007 amounts to Euro 7,076,021 and consists of the following:

- 'legal reserve' amounting to Euro 54,944 corresponding to 5% of the previous year's result as deliberated by the shareholders' meeting of 27 April 2007;
- 'future capital increase account reserve' amounting to Euro 5,000,000 relating to the deposit made by Abaco Innovazione on 28 November 2007. It is specified that the 2006 reserve (amounting to Euro 6,000,000) was used in its entirety as already described in the 'Company Capital and Share Surplus Reserve' items;
- 'extraordinary reserve' amounting to Euro 82,000;
- 'other reserves' amounting to Euro 1,418,000 relating to contributions received;
- 'stock option reserve' amounting to Euro 266,502, set up to exercise those option rights resulting from implementation of the stock option plan described in the '**Year's Significant Events – Stock Option Plan**' paragraph of the **Management Report**;
- Euro -129,516 relating to capital increase related consultancy costs;
- 'IAS/IFRS transition reserve' amounting to Euro 124,949 resulting from changes made following the adoption of the IFRS standards, varying by Euro 12,726 on 31 December 2006 as a result of reclassifying said amount amongst the IAS/IFRS reserves available.
- 'IAS /IFRS transition reserve available', amounting to Euro 378,051, relating mainly to the revaluation and IAS/IFRS transition reserves available as a result of the depreciation accrued as at 31 December 2007;

- Euro -118,909 'IAS/IFRS fiscal effect reserve' representing the fiscal effect calculated on the variations made following the adoption of the IFRS reporting standards varying by Euro 17,087 as a result of being reclassified as 'IFRS transition reserves available'.

PREVIOUS YEARS' RESULTS

NON CURRENT LIABILITIES

Non current payables to banks

The balance, as at 31 December 2007, amounts to Euro 20,688,137 compared to the Euro 4,271,353 of 31 December 2006 and relates to medium term finance and mortgages with major banks. The year's variation mainly relates to the finance requested for the aforementioned acquisitions (Euro 15,000,000).

Other financial liabilities

The balance, as at 31 December 2007, amounts to Euro 893,373 compared to the Euro 1,534,411 of 31 December 2006 and relates to the previous year's INPS debts being paid in instalments. The Euro 641,038 decrease is the result of reclassifying medium and long-term debts as short term debts.

Provision for risks and charges

The balance, as at 31 December 2007, amounts to Euro 499,197 compared to the Euro 215,400 of 31 December 2006; the movements are as follows:

Description	31/12/2007	31/12/2006	Variations
Fund for company restructure		135.400	(135.400)
Fund to cover losses	50,000	50,000	
Fund for stock related risks	100,000		100,000
Fund for staff related risks	10,000		
Fund for contribution related risks	110,000		100,000
Fund for tax bill related risks	229,197	30,000	219,197
TOTAL	499,197	215,400	283,797

The Euro 50,000 provision relates to the fund to cover losses created by Exprivia Solutions S.p.A. in relation to its subsidiary Farm S.r.l. in liquidation.

The Euro 10,000 provision relates to the fund set up by Wel.Network in relation to an ex-employee with whom it has a dispute.

The Euro 110,000 provision relates to possible non-recognition of Law 488/92 related facilities that are currently being verified; this sum corresponds to the contribution due on the same investment programme as at 31 December 2007.

The Euro 229,197 tax bill related provision consists of:

- ✓ a tax credit of Euro 190,000 for 2000 not acknowledged by Abaco Innovazione; the said bill was reflected in Exprivia S.p.A. for those liabilities resulting from Abaco Innovazione S.p.A.'s contribution of the company unit to Abaco Information Services S.r.l. and subsequently merged into the company;
- ✓ a tax bill of Euro 15,875 issued to Exprivia S.p.A. for taxes in previous years on refuse that are in the process of being verified with the issuing body;
- ✓ Euro 23,322 relating to Wel.Network S.p.A. to whom the Piacenza Revenue Agency issued a 2004 inspection report on 7 December 2007. The said report notifies the company of presumed breaches of the VAT regulations, undeclared surpluses, unrelated representation costs and software capitalisations. The company drew up an exhaustive response submitted on 25 October 2007 enclosed with the Revenue Agency's report. The document contests the findings providing a suitable explanation for all the operations carried out. An opinion was sought from the professionals delegated to assist the company in relation to the Revenue Agency in order to draw up the balance sheet as at 31 December 2007 correctly; it was suggested that a prudential provision of Euro 23,000 be made to cover possible disputes. However, the company sent the Piacenza Revenue Agency a letter on 4 February 2008 with further comments on the report and requesting the findings be further reviewed.

With reference to AISoftw@re Professional Services S.r.l., excluded from the consolidation area as already mentioned in the 'Consolidation Area' item of this supplementary note, the following disputes are noted:

- ✓ Abruzzo Finance: an appeal has been made to the State Council against the sentence of the TAR (Regional Administrative Tribunal) of June 2007 rejecting the petition to annul the management order of the Abruzzo Regional council of May 2000 revoking POP contributions;
- ✓ The recovery of the ten year exemption 1991-2000 for IRPEG ILOR taxes. Following the Aquila Provincial Tax Commission sentence of 7 June 2007 rejecting the appeal against the Revenue Agency of Avezzano for registering ILOR and IRPEG for 1991-2000, with the support of the 'Parere pro veritate'

expressed by a major legal company of Rome, we are proceeding to draw up an appeal to the Abruzzo Regional Tax Commission;

- ✓ Recovery tax credit law 388/2000: the Aquila Provincial Tax Commission accepted the petition presented by the company and found the Avezzano Revenue Agency's attempt to recover taxes unlawful with the sentence deposited on 7 June 2007;
- ✓ Recovery CFL facilities resulting from European Commission sentence: in May 2007 a petition was submitted to the Court of Avezzano Employment Division opposing the tax bill issued by Gerit to recover taxes on behalf of the INPS of Avezzano; the petition to suspend enforcement was granted and the first hearing on this has been postponed to 7 October 2008;
- ✓ Recovery facilities law 407 for 2002-2005: an appeal in accordance with Art. 23 of Law 88/89 was lodged against report 538 of 28.09.07, notified on 30.10.07, on 26 November 2007;
- ✓ Recovery tax credit with Labornet Sistemi (company merged with AIS Professional): the petition to the Aquila Provincial Tax Commission against the Rome 1 Revenue Agency has been rejected; an appeal to the Rome Provisional Tax Commission is being drawn up. The Euro 30,000 provision is being maintained.

It is noted that the Revenue Office – Tax Police of Bari notified Exprivia S.p.A. of an inspection report on 18 December 2007. This report contests undue depreciation rates on goodwill, contributions on financed research projects, contingent liabilities, restructuring costs and depreciation rates on shareholdings in 2002 and 2003. The company requested an assessment in accordance with Legislative Decree 218/97 on 12 February 2008. In addition, the company has appointed a tax office to assist it in its dealings with the Revenue Agency.

Exhaustive analysis of the Report has highlighted the company's presumed evasion is based on extremely vague and however contestable elements. However, with reference to the finding that the losses of subsidiary companies were incorrectly carried forward to the parent company, the company has collated the materials necessary to contest the finding at the tax office that dealt with the contested facts at the time. Further, it should be noted that all balance sheets and documents relating to the documentation that is the subject of the Report have been certified by the auditing company.

On the basis of those opinions sought from the professionals in question, it has been confirmed that even if the findings were found to be true, they would have no effect on the Balance Sheet as at 31 December 2007 as recovery of previous losses.

Staff related funds

END OF MANDATE PAYMENT

The balance amounts to Euro 92,961 and refers to amounts accrued relating to the managing director of Svmservice S.p.A.

EMPLOYEE RETIREMENT ALLOWANCE

The RA fund, calculated in accordance with the provisions of IAS 19, amounts to Euro 7,312,108 as at 31 December 2007 compared to Euro 4,356,504 at 31 December 2006. The variations for the period are as follows.

Description	31/12/2007	31/12/2006	Variations
Initial amount	4,356,504	3,961,577	394,927
Fund transfer as a result of merger	3,932,167		3,932,167
Year's drawdown	(2,012,564)	(701,252)	(1,311,312)
Year's provision	1,036,001	1,096,179	(60,178)
Year end total	7,312,108	4,356,504	2,955,604

It is specified that the variation in the 'drawdown' item is mainly attributable to the new regulations stating that retirement allowances accrued during the year be allocated to the pension fund and INPS as from 2007. It is specified that Euro 1,142,753 of the year's provision of Euro 1,036,001 is for service costs, Euro 239,710, interest costs and Euro 346,462 actuarial gains.

NON CURRENT PAYABLES TO BANKS

The balance, at 31 December 2007, amounts to Euro 18,876,514 compared to the Euro 4,271,353 of the previous year, Euro 15,000,000 referring to the medium/long term share of the Euro 19,500,000 financing used to acquire Svimservice S.p.A. and Wel.Network S.p.A.

OTHER FINANCIAL LIABILITIES

TAX AND SOCIAL SECURITY DEBTS PAYABLE BEYOND THE YEAR

The balance of Euro 306,390 compared to that of Euro 646,588, at 31 December 2006, refers to the reclassification of the INPS debt, relating to future years, as a result of payment in monthly instalments in progress with Social Security bodies.

PROVISION FOR RISKS AND CHARGES

OTHER PROVISIONS

The balance, at 31 December 2007, amounts to Euro 315,875 compared to Euro 135,401 at 31 December 2006 and refers to:

The set aside for a Euro 190,000 2000 tax credit not acknowledged by the Revenue Agency and against Abaco Innovazione relating to 2000; the bill was reflected in Exprivia S.p.A. with regard to the obligations resulting from grant of the company complex from Abaco Innovazione S.p.A. to Abaco Information Services S.r.l. and subsequently incorporated in the company;

The Euro 110,000 provision relates to possible non-acknowledgement of Law 488/92 related facilities that are currently being verified; this sum corresponds to the contribution due on the same investment programme at 31 December 2007;

Euro 15,875 for the tax bill issued to Exprivia S.p.A. for the tax on refuse in previous years for which inspections are being carried out with the issuing body;

It is specified that the Revenue Office, Tax Police of Bari notified Exprivia S.p.A. of an Inspection report on 18 December 2007. This report contests undue depreciation rates on goodwill, contributions on financed research projects, contingent liabilities, restructuring costs and depreciation rates on shareholdings in 2002 and 2003. The company requested an assessment in accordance with Legislative Decree 218/97 on 12 February 2008. Further, the company has appointed a tax office to assist it in its dealings with the Revenue Agency.

Exhaustive analysis of the Report has highlighted the company's presumed evasion is based on extremely vague and however contestable elements. However, with reference to the finding that the losses of subsidiary companies were incorrectly carried forward to the parent company, the company has put together the materials necessary to contest this finding at the tax office that dealt with the contested facts at the time. Further, it is noted that all balance sheets and documents relating to the documentation that is the subject of the Report have been certified by the auditing company.

On the basis of the opinions sought from the professionals in question, it has been confirmed that even if the findings were found to be true they would have no effect on the Balance Sheet at 31 December 2007 as recovery of previous losses.
