

AISoftw@re SpA and Labornet SrL have agreed to the transfer of 60% of Labornet to AISoftw@re

The global investment amounts to 4.2 billion liras (2.169 million euro) through the acquisition of part of the existing shares

Milan, 13th December 2000

AISoftw@re SpA and Labornet Srl, a company focused on IT personnel outsourcing for advanced software and Internet software projects, have agreed to the transfer of 60% of Labornet to AISoftw@re.

The transaction represents an investment of 4.2 billion Liras (2.169 Million Euro) and will be implemented through the swap of part of Labornet's existing shares with AISoftw@re new shares.

The Labornet transaction is in line with the acquisition policy announced from AISoftw@re Group and completes and enriches the technological expertise of the Advanced Software Systems Business Unit of AISoftw@re with a new structure that has a strong competent team with a consolidated experience in human resources outsourcing for software projects, particularly in the Internet area, and in recruitment and training of IT personnel.

"Finding skilled IT resources, moreover with a strong sector expertise, is the real problem for the growth of IT companies today. With this acquisition, AISoftw@re" - explains Prof. Francesco Gardin, President and CEO of AISoftw@re - "ensures a structure for itself that will be able to train and introduce people into a working environment as well as assisting them throughout the professional steps of this process. At the end of this training cycle personnel will become permanent staff of the AISoftw@re Group projects development team. Within 12 months we have achieved the goal of creating an Advanced Software System Business Unit with a structure of 450 software developers (direct and indirect) from the original 40 IT staff. The Business Unit spans horizontally from mainframe to Internet browser, and vertically from data to knowledge management".

"Becoming part of the AISoftw@re Group" - says the General Manager of Labornet, Sandro Cianflone Mottola - "will allow to take advantage of the synergies with the other companies of the AISoftw@re Group and by offering IT skills with a strong technical background that will help accelerate the growth of our company. AISoftw@re represents the ideal partner to maximise the opportunities of our reservoir of IT human resources involving them in projects with high level of technological content".

The transaction is subject to a due diligence having first been successfully completed.

AISoftw@re

AISoftw@re SpA - founded in 1983 and with a consolidated value of production in 1999 of Euros 11,882 million - is a company specialised in the development of decision-supporting knowledge processing and data intelligence technologically innovative Internet and Intranet solutions.
