

## PROSAP (EXPRIVIA GROUP): GO-LIVE FOR MAJOR CONTRACT IN THE PORTS OF MEXICO (APIS)

**13 June 2013.** **ProSAP** - an Exprivia Group company active in the North and South American markets with offices in Mexico, Guatemala and Peru – has launched a project to harmonise the computer systems of 11 Mexican port authorities (APIS), based on integrated SAP management systems for accounting.

Developed in association with the Mexican national port coordination authority and the administrations of the port authorities involved, the project represents a model of reference for port authorities in Latin America and responds to the Mexican Ministry of Communications and Transport's specific request for harmonious economic, financial and balance sheet policies and criteria.

The Mexican port system comprises 117 ports and terminals at national level, including the zones of the Pacific, the Gulf of Mexico and the Caribbean. These ports are managed by 16 Integrated Port Authorities (APIS), 11 of which were involved in the project developed by ProSAP having already switched to SAP technology. Studies are ongoing with regard to the involvement of the other five authorities.

ProSAP developed the project carrying out all of the phases established by the directive on the "harmonisation of accounts": the migration of the various ERP systems of the different Port Authorities, the monitoring of accounting processes and the development of harmonious reporting models for financial and balance sheet aspects.

*"The go-live of this complex project in such quick time" remarks **Domenico Favuzzi**, Chairman and CEO of Exprivia SpA "is confirmation of the Exprivia Group's skills and expertise in the SAP area as well as its in-depth knowledge of the typical processes of the Mexican port system and the regulations to which the authorities are subject. The Exprivia Group has achieved this commercial success thanks to its 25-plus years of experience in this segment and its knowledge of the Mexican market via the Prosap office, confirming its ability to develop complex solutions for the international market."*

Last year the International area, including the offices in Spain, Mexico, Guatemala, Peru and Brazil, increased its revenues quite significantly (+48%), accounting for 11% of the Group's turnover.

## EXPRIVIA
