

## Press Release

# EXPRIVIA WILL DEVELOP THE HEALTHCARE INFORMATION SYSTEM OF REGIONE CALABRIA AND OF CITY'S HEALTHCARE CENTERS

*During the today's press conference Regione Calabria has issued the announcement of the signing of the agreement.*

*By means this contract Exprivia, in pool with Data Processing, confirms its role as primary supplier in the e-health field and will allow Regione Calabria to implement the most advanced policies of the healthcare processes management at local level.*

**July 7, 2014.** Exprivia - a company listed on the STAR segment of Borsa Italiana [XPR.MI] – has won the tender, in pool with Data Processing for the implementation of the health information system of Regione Calabria (SEC-SISR). The news of the the signing of the contract has been announced today in a press conference called by the Regione Calabria.

The activities covered by the contract signed today, will address **the development and management of the Regional Healthcare Master Index, the Regional Decision Support System, the Accounting Administrative Integrated System, the Regional Health Government System, the Pathology Registry System and the entire technology platform with the infrastructure components.**

For the implementation of the healthcare information system of Regione Calabria, **Exprivia** will exploit its **e4cure suite** competences and solutions for the governance, strategic control management of the top management information systems. The **e4cure suite**, which includes innovative solutions **for the governance and control at the regional level**, for **community care** delivered by the City's Healthcare Centers and for **hospital care**, is installed in more than **200 healthcare organizations** and public and private hospitals distributed **throughout Italy** and in **40 hospitals outside Italy**.

**Data Processing** will provide its suite of software products **Smart \*Health** and the related services for starting City's Healthcare Centers and Hospitals in Region of Calabria. Smart\*Health, specialized in the process management and dematerialization processes, consists of an integrated accounting system (\*Financial), of a system for managing procurement and logistic process management (\*Logistic), of a system for the human resources management (\*HCM) and of a document management system (\*Flow).

The contract has a value for the overall pool of **Euro 13.3 million**, of which approximately 50% is the share of Exprivia. The contract will run for 48 months.

The completion of this ambitious project will streamline the accounting systems and processes for the management of healthcare organizations, in order to facilitate information flows trough the Regional Government and at the same time, to facilitate the fitting of the governance systems of the Regional Healthcare Institutions with the various peripheral and central entities (City's Healthcare Centers, Ministry of Healthcare).

## Press Release

The SEC-SISR will support: the Department of Health of Regione Calabria to achieve the cost and financial objectives defined and all Health Authorities in the region, for the operation of the administrative-accounting system and governance system, as well as the compliance with the organizational, fixed operational and financial constraints.

*"This important and strategic contract confirms the role of leadership of Exprivia in the implementation of healthcare IT solutions"* said **Domenico Favuzzi**, President and Chief Executive Officer of Exprivia. *"The Exprivia Group, in fact, has been characterized by its ability, competence and innovative approach as a reference point in government projects at the regional level, in addition to its capabilities in realizing innovative solutions for hospitals, where it counts more than 240 domestic and foreign references"*.

*"Information technology is an efficiency enabling factor in the era of <connected health>"*, said **Marco Aldrovandi**, President of Data Processing. *"Our suite Smart\*Health helps to simplify management tasks and provides a solid knowledge of the performances in support of management decision making, to promote efficiency through optimal use of available resources."*
