

COMUNICATO STAMPA

## EXPRIVIA | ITALTEL AT CISCO LIVE! 2019: INTELLIGENT NETWORKS AND MORE QUICKLY TECHNOLOGIES PUSH THE DIGITAL REVOLUTION IN THE INDUSTRY

*At the fair in Barcelona, until 1 February, the group presents new use cases in the  
Connected Factory and Smart Working field.*

**January 30<sup>th</sup>, 2019.** On the occasion of the Cisco Live! 2019, held in Barcelona in recent days, Exprivia | Italtel presents some cases of use of Cisco's innovative platforms in Industry 4.0 and Smart Working field. Exprivia's know-how in the application field and the focus of Italtel on network infrastructures and TLC markets, are integrated with Cisco technologies - in which Italtel is certified Gold Partner in various countries of the world - to offer the Industry sector, especially the sector manufacturing, IoT solutions and increasingly connected systems that increase efficiency and productivity.

*"In the challenge to Industry 4.0, strongly influenced by the significant impact of faster and faster technologies, such as the 5G - commented **Domenico Favuzzi**, who heads the Exprivia|Italtel group - only those who are able to manage complex projects win. We are proud to present ourselves once again with Cisco to demonstrate the enormous potential that comes from the integration of the group's expertise applicable on an international scale "*

*"The solutions we present at Cisco Live! confirm that Exprivia|Italtel is today a valid interlocutor of the business world - says **Stefano Pileri**, Italtel CEO - able to cover the entire industrial chain that starts from sensors and physical connectivity of the plants with the latest wired and wireless technologies, up to integration with management systems and the development of customized processes "*

In fact, in the Industry offer of the Exprivia|Italtel group, a particular focus is given to the theme of the 'Connected Factory', where the connection of plants with industrial analytics systems is able to improve production cycles and interventions in case of malfunction. The Italtel 'Indymachine' solution, in particular, guarantees direct access to the data generated by the production machines and the interconnection of the same with the rest of the factory and with the information systems. Italtel has used an ecosystem of strategic partners, such as Cisco with its IoT portfolio, Alleantia and its own software development skills (Custom Dashboards and Chatbots).

## COMUNICATO STAMPA

The connected machine is the first step to start the digital transformation of the manufacturing sector, as the direct access to the data of the production machines allows to accelerate the industrial processes. Thanks to local gateways directly connected to plant plc and Cisco IP network infrastructure, industrial devices are made intelligent and interconnected with the rest of the factory. The collected data are exchanged with the company ERP systems and this allows automating the activities, improving overall operational efficiency, and creating value from the data.

## EXPRIVIA|ITALTEL

**Exprivia** is an international group specialized in Information and Communication Technology able to direct drivers of change in the business of its customers thanks to digital technologies. With a know-how and experience gained in over 30 years of constant presence on the market, Exprivia has a team of experts specializing in various fields of technology and in the main areas within this sector, from the Capital Market, Credit & Risk Management to IT Governance, from BPO to IT Security, from Big Data to Cloud, from IoT to Mobile, to SAP.

Listed on Borsa Italiana Stock Exchange since 2000 to the STAR MTA (XPR) segment, Exprivia supports its clients in the Banking & Finance, Telco & Media, Energy & Utilities, Aerospace & Defense, Manufacturing & Distribution, Healthcare and Public-Sector sectors.

In 2017 Exprivia acquired 81% of the share capital of Italtel, a historic Italian company that today operates in the ICT market with a strong focus on the Telco & Media, Enterprises and Public-Sector markets. The Italtel offer includes solutions for networks, data centers, business collaboration, digital security, internet of things. The solutions are made up of own and third-party products, engineering services and consultancy.

Today the group Exprivia and Italtel has about 3,400 professionals distributed in over 20 countries worldwide.

Exprivia is subject to the direction and coordination of Abaco Innovazione S.p.A.
