

## EXPRIVIA TECHNOLOGY MAKES THE FIRE BRIGADE'S RISK PREVENTION ACTIVITIES MORE EFFICIENT

**The company has been awarded the tender for a modern IT solution for the prevention and management of risks related to the spread of chemical, biological, radioactive, nuclear and explosive substances**

**February 4, 2019.** **Exprivia** - a company listed on the STAR segment of the Italian Stock Exchange [XPR.MI] - was awarded, as a mandate together with the company CAE of Bologna, the public tender published by the Ministry of the Interior for the implementation of the project to strengthen the national system for prevention and management of crises and safety risks related to CBRN-E agents (Chemical, Biological, Radioactive, Nuclear and Explosive) on behalf of the Fire Brigade, Public Rescue and Civil Defence Departments.

The contract is for approximately 5.8 million euros (82% attributable to Exprivia and the remaining 18% to CAE) for 24 months.

The project will cover the entire Italian territory and includes a series of technologically integrated activities aimed at ensuring the modernisation and extension of the current systems for monitoring the transport risk of radioactive pollutants and the absorption of gamma rays.

The activities include the supply and installation of a modern network of detecting sensors and spectrometers to monitor "risk" areas, the technological adaptation of the existing monitoring network and the creation of a central system for the detection, control, analysis and simulation of emergency scenarios, thereby allowing the integrated management of alarms. The system will also be dedicated to enhancing personnel training and formative activities and greater coordination between institutional actors through the automation of information processes.

*"We are very proud to support the National Fire Brigade in its institutional duties of prevention, aid and support to citizens through modern information technology"- declared Dante Altomare, Vice Chairman of Exprivia. "This project enriches our portfolio of offers addressed to Public Administration and is part of Exprivia's mission to contribute to the digital transformation of national public infrastructures".*

The IT solution proposed to the Fire Brigade Department has a modern graphic interface that will simultaneously display data from sensors and various service providers (such as weather data and detailed maps), generate reports for institutions outside the Department (Ministry of Defence, ARPA, ISPRA,

PRESS RELEASE

Prefectures, etc.), and be integrated with the alarm dispatching platform that the National Fire Brigade already uses.

## Exprivia | Italtel

**Exprivia** is an international group specialized in Information and Communication Technology able to direct drivers of change in the business of its customers thanks to digital technologies. With a know-how and experience gained in over 30 years of constant presence on the market, Exprivia has a team of experts specializing in various fields of technology and in the main areas within this sector, from the Capital Market, Credit & Risk Management to IT Governance, from BPO to IT Security, from Big Data to Cloud, from IoT to Mobile, to SAP.

Listed on Borsa Italiana Stock Exchange since 2000 to the STAR MTA (XPR) segment, Exprivia supports its clients in the Banking & Finance, Telco & Media, Energy & Utilities, Aerospace & Defense, Manufacturing & Distribution, Healthcare and Public-Sector sectors.

In 2017 Exprivia acquired 81% of the share capital of **Italtel**, a historic Italian company that today operates in the ICT market with a strong focus on the Telco & Media, Enterprises and Public-Sector markets. The Italtel offer includes solutions for networks, data centers, business collaboration, digital security, internet of things. The solutions are made up of own and third-party products, engineering services and consultancy.

Today the group Exprivia and Italtel has about 3,400 professionals distributed in over 20 countries worldwide.

Exprivia is subject to the direction and coordination of Abaco Innovazione S.p.A.
