

PRESS RELEASE

## HIGH SCHOOL GRADUATE STUDENTS FROM APULIA AT SOFTWARE SCHOOL: NEW EDITION OF THE HIGH TECHNICAL SPECIALISATION COURSE LAUNCHED BY ITS APULIA DIGITAL MAKER IN COLLABORATION WITH EXPRIVIA|ITALTEL

**The advanced training course is free and will take place in the offices of Foggia, Molfetta and Lecce. Applications by October 19.**

**15 October 2019.** The highly specialised post-graduate two-year '**Developer 4.0**' technical course, organised by **ITS Apulia Digital Maker from Foggia** in collaboration with **Exprivia|Italtel**, international company specialised in Information and Communication Technology, has been renewed this year, for its second edition.

The new training scope in the field of computer programming this year is held, in addition to Molfetta, in Foggia and Lecce as well. The goal of the course is the direct integration in the job market of young Apulian high school graduates with skills in **Java Enterprise Edition, PL / SQL, Big Data and Cloud** languages suitable for responding to the digital transformation taking place in the public and private sector.

The educational courses proposed in the three Apulian ITS locations - between the two highly specialised institutes of technological specialization in southern Italy accredited by the MIUR in the ICT training area - are **completely free of charge** and have been planned with the professionals from Exprivia|Italtel, a company consisting of about 4000 professionals distributed in about 20 countries around the world, **which aims to train 75 Apulian high school graduates in software development for recruitment by the company.**

*"We renew the partnership with ITS Apulia Digital Maker - says Domenico Favuzzi, Head of the Exprivia|Italtel Group - for the second edition of this course with the aim of attracting as many talents as possible among young people of our territory. Indeed, in the next four years, we expect the recruitment of around 600 people in southern Italy, in line with our Industrial Plan. We have embraced the idea of expanding ICT training in Foggia and Lecce, as well as establishing training partnerships in Sicily and Lazio to bridge the gap between labour demand and supply which, unfortunately, characterises the IT-sector in the South".*

## PRESS RELEASE

Among the various innovations of this new two-year period, **students will be included in the Adisu Puglia system** and will be able to enjoy the benefits and services for the right to university education offered by the Puglia Region.

With the 'Developer 4.0' course, high school graduates will acquire an EU-wide recognised qualification and training directly in the field: **1,800 hours of theoretical and laboratory training, with 60% of teachers coming from the business world, internships in the company.**

For each of the three locations, the course is reserved for 25 participants who have passed the entry-level selection. To participate in the selections it is necessary **to register by October 19, 2019**, on the [Apulia Digital Maker website](#).

## PRESS RELEASE
