

## EXPRIVIA'S OPEN SOURCE TECHNOLOGY IN SUPPORT OF CHILDREN'S HEALTH

**The Gianni Benzi Onlus Foundation and Janseen Pharmaceutical NV decide to employ the Apulian company to produce the new IT system for the 'Conect4children' network on paediatric clinical trials**

**18 December 2019** - **Exprivia** will implement the new information system of 'conect4children' (c4c), a large collaborative European network that facilitates the development of new medicines and therapies for the paediatric population.

c4c (conect4children.org) is a pioneering project, funded under the Innovative Medicines Initiative (IMI) 2, for the implementation of multinational paediatric clinical trials in which the academic and private sectors cooperate. The network now includes 33 academics and 10 private partners from 20 European countries, over 50 third parties and about 200 clinical centres.

The **Gianni Benzi Onlus Foundation**, after a long selection phase in partnership with **Janseen Pharmaceutical NV**, has asked Exprivia to develop the new c4c information system: a technological solution based on 'best in class' products from the open source world. This is a very high level technological answer that at the same time keeps the system's implementation and executive management costs low.

The new information system will allow the measurement and monitoring of performance in paediatric clinical trials conducted within the network. At the same time, it will provide the IT tools for the network's operation, such as contact management, management, processing and traceability of internal and external requests, management of business processes, data collection and management and business intelligence activities.

*"Conect4children - stresses **Arturo Possidente**, Sales Manager Public Sector & Healthcare of the Exprivia Group - is one of the main European projects seeking to innovate paediatric clinical development processes. We will be helping to create a state-of-the-art information system with low management costs, which will make the work of doctors and researchers involved in the development of revolutionary treatments for children's health more efficient".*

*"We are very satisfied with Exprivia's technological offer to us - says **Fedele Bonifazi**, president of the Gianni Benzi Onlus Foundation - also because the partnership that starts with today's kick off is a virtuous example of cooperation between local bodies that will see researchers from Exprivia and the Foundation working together. The conect4children project is currently one of the most important in terms of economic investment and human resources mobilised. We are proud to be part of it".*

## Exprivia

Exprivia is the parent company of an international group specialized in Information and Communication Technology able to direct drivers of change in the business of its customers thanks to digital technologies.

With a consolidated know-how and a long experience due to the constant presence on the market, the group has a team of experts specializing in various fields of technology and in the main areas within this sector, from the Capital Market, Credit & Risk Management to IT Governance, from BPO to IT Security, from Big Data to Cloud, from IoT to Mobile, from networking to enterprise collaboration to SAP. The group supports its clients in the Banking & Finance, Telco & Media, Energy & Utilities, Aerospace & Defense, Manufacturing & Distribution, Healthcare and Public-Sector sectors. The group offering is made up of solutions that are composed of third-party products, engineering services and consultancy.

Following the acquisition of 81% of Italtel's share capital, an historic Italian company that today operates in the ICT market with a strong focus on the Telco & Media, Enterprises and Public-Sector markets, today the group has about 4,000 professionals distributed in over 20 countries worldwide.

Exprivia S.p.A. is listed on Borsa Italiana Stock Exchange since 2000 to the STAR MTA (XPR).

Exprivia is subject to the direction and coordination of Abaco Innovazione S.p.A.
