

CLOUD: EXPRIVIA IS THE NEW ADVANCED PARTNER OF AMAZON WEB SERVICES

Together with AWS, Exprivia leads corporate customers in the migration to the cloud

29 June 2020 - **Exprivia** becomes '**Advanced Partner**' of the **Amazon Web Services (AWS) Partner Network** concluding, in collaboration with Italtel, the 'Solution Provider' certification programs that allow the Italian ICT multinational to create solutions and services through the most complete and used cloud technology in the world.

The certifications are extended to all companies of the group, which can now lead the '**cloud journey**' of their clients in both the Commercial and Public Sector in Europe and the UK.

Exprivia has relationships and collaborations with world-class cloud providers: the partnership with AWS is an important addition to the Public Cloud strategy. The recent opening of AWS's Italian headquarters in Milan, with servers physically located in our country, is an important opportunity to accelerate the digital transformation of various industrial sectors and the Italian public administration.

The Company relies also on a valid ecosystem of technological partners with distinctive specificity and know-how related to the cloud, from application migration tools to backup and recovery solutions, and is able to propose tailored paths based on the specific needs of each customer.

"The new certification obtained is a step forward to the path started some time ago and proves our commitment and our skills in guiding customers in their cloud journey. From public administrations to healthcare institutions to businesses, the cloud ensures high stability, scalability of services and better security in data and process protection. For modern, digital and flexible business strategies, adopting this technology has become more than ever necessary"- says Felice Vitulano, Exprivia's Innovation Director.

The first step is an accurate assessment of the IT environment, starting from hardware and software platforms up to applications that, in order to operate safely and at maximum effectiveness in new cloud environments, often have to undergo a re-design process.

Exprivia, which with Italtel has more than 50 professionals trained in AWS cloud topics with specialties in Advanced Networking and Machine Learning, has solid expertise in system integration, development of cloud-native products with devops method and references for implementations in private, public and hybrid-cloud environments.

Exprivia

Exprivia is the parent company of an international group specialized in Information and Communication Technology able to direct drivers of change in the business of its customers thanks to digital technologies.

With a consolidated know-how and a long experience due to the constant presence on the market, the group has a team of experts specializing in various fields of technology and in the main areas within this sector, from the Capital Market, Credit & Risk Management to IT Governance, from BPO to CyberSecurity, from Big Data to Cloud, from IoT to Mobile, from networking to enterprise collaboration to SAP. The group supports its clients in the Banking & Finance, Telco & Media, Energy & Utilities, Aerospace & Defense, Manufacturing & Distribution, Healthcare and Public-Sector sectors. The group offering is made up of solutions that are composed of third-party products, engineering services and consultancy.

Following the acquisition of 81% of Italtel's share capital, an historic Italian company that today operates in the ICT market with a strong focus on the Telco & Media, Enterprises and Public-Sector markets, today the group has about 3,600 professionals distributed in over 20 countries worldwide.

Exprivia S.p.A. is listed on Borsa Italiana Stock Exchange since 2000 to the STAR MTA (XPR).

Exprivia is subject to the direction and coordination of Abaco Innovazione S.p.A.
