

## EXPRIVIA|ITALTEL'S PROPOSALS FOR TELCO & FINANCE AT BLOCKCHAIN WEEK ROME

**The company 'Blockchain Lab' that works on future applications of this technology is underway.**

**Giorgio Angiolini, Exprivia|Italtel Head of Portfolio Marketing and a member of the blockchain ministerial task force, will be among the speakers at the event.**

**Rome, 25 June 2019** – Exprivia|Italtel will present its solutions based on Blockchain for Telco, Fintech and Insurtech sectors during the first Italian edition of the 'Blockchain Week', the largest event dedicated to blockchain technology and the Cryptocurrency world that kicks off today in Rome.

Exprivia|Italtel's Telco offer is one of the first blockchain-based number portability solutions. Thanks to this technology, users will be able to change their mobile network operator and choose the best offers in a simple way, without any service interruption, and while keeping their own phone number.

Exprivia|Italtel incorporates the "NFV-ready" i-RPS solution, a centralized routing & policy engine, already in its portfolio, with the addition of blockchain technology, in order to direct the number portability procedure and reduce turnaround times, mistakes, and, most importantly, the costs related to operator switching. The solution automates data synchronization and works in real time: mobile phone operators in a specific country will be able to access the complete number portability database, eliminating any misalignment of user data.

Exprivia|Italtel is also introducing its blockchain offerings in the finance sector, where it boasts an important partnership with R3, the banking consortium that is currently studying how to use blockchain technology for bank-related operations. The consortium members of this association are working together on the development of Corda, a DLT (Distributed Ledger Technology) open source technology platform for recording, managing and synchronizing the financial transactions that has become the reference standard for this market and that Exprivia|Italtel is working on in order to implement a solution in the credit/factoring field.

This event will also be an opportunity to present the new 'Blockchain Lab' created by Exprivia|Italtel, a team working on the creation of future applications for blockchain technology and on specific projects according to the needs of its customers.

Among the speakers of the Roman edition of the event, where there will be an entire weekend dedicated to conferences, networking, and exhibitions, including Giorgio Angiolini, Head of Portfolio Marketing for Exprivia|Italtel. Angiolini is one of the experts working as part of the task force created by MISE to provide our country with a national blockchain strategy.

## COMUNICATO STAMPA

### EXPRIVIA|ITALTEL
